From the Presidents Mic!

QST! QST! de **WA4ZXV, Norm Schlar**

Along with a reminder of a great meeting scheduled for August 14, and the dog show/fund raiser coming up, I found the below printed message on one of the reflectors. We're lucky to have a lot of **Backbones** in GARS. We get a lot done, but not as much as we could if we could convert some of the other "bones" to **Backbones**.

This month's meeting will definitely be worth sharing with your friends. Thanks to our Program Manager, Dave, (W4DTR). Paul Pescitelli (K4UJ) will be sharing his experience with the **April 2007 Expedition to Scarborough Reef**. I'll ask David to bring a few extra doughnuts, and Doug a few extra drinks, so spread the word and let's have a huge audience. Don't forget, you're also invited to come have Pizza with several of us that gather at Lilburn Pizza about 5:30 before the meeting.

If you haven't already signed up for a spot to work the dog show, contact Amy (KE4IKF), and she'll get it done. If you're not sure what we're talking about, just give Amy or me a call and we will go over the details. More information will be available at the August meeting.

"This article has been published many times over the years by many amateur radio news sheets. Each time it is published, the editor adds to or modifies the content to suit his or her Club situation, but the message it contains remains the same. This message, I hope, will not only be thought provoking but will invoke a little self-criticism where needed.

The structure of an organization is made up of four kinds of bones. There are **Wishbones**, who spend all their time wishing somebody else would do something about this, or something about that. There are the **Jawbones**, who do all the talking, but very little of anything else. Next comes the **Knucklebones**, who knock everything that others are trying to do. Finally, there are the **Backbones**, who get under the load and do the work. What part of the organization's structure are you? If you are a Wishbone, Jawbone, or Knucklebone, what kind of a Ham are you? Are you happy?

Take a good look at the **Backbones** in your radio club. These people are not always the board members, but they certainly are the "doers" in the club. I can well imagine that the **Backbones** also have happy family lives, because it seems that hard work and self-confidence seem to extend into family and working partnerships as well. What constantly amazes me is the number of **Backbones** who spend long hours representing or working for the club. They seem to never tire making the Club's activities successful.

We hear a lot about getting involved. Take it from one who knows, getting involved is the best therapy there is for adjusting to the life of a Ham. You'll see a change for the better not only in yourself, but in your hobby and your club. You'll suddenly find people are friendlier; there is no spare time to wonder how to fill as there is work to do for each and every one of us in the club. But, most important of all, you will suddenly realize what you are doing for others. What a beautiful example to set for your children.

So why don't you take a personal inventory? If you are honest with yourself and find you are a **Wishbone, Jawbone or Knucklebone**, there is no time like the present to make the change so you, too, can become a **Backbone**. The dedicated, hard working **Backbones** will welcome you joining them. Only in this way can the Club continue to serve amateur radio and the community."

Reprinted from "QUA/HAMnews" March 1991 which is published by the Bluegrass Amateur Radio Society, Inc. Lexington, Kentucky.

The GARZETTE

The GARZETTE is the official monthly organ of the Gwinnett Amateur Radio Society serving its members and other persons interested in the advancement of the amateur radio art.

Original articles, art, and photos are invited and encouraged. Previously copyrighted submissions cannot be accepted for reprinting unless permission from the appropriate publisher is provided in writing along with the information being submitted. If reprints are from publications allowing their unrestricted use, please include a copy of the printed permission contained in the publication.

If possible, bring your articles to the monthly meeting in Microsoft Word format or email to ka4kkf@arrl.net. Artwork can be accepted in most any graphics format and can be submitted via email to the same address. Alternate means of submittal can be arranged when necessary. In keeping with the amateur radio spirit, permission is hereby granted for the reproduction of *The GARZETTE* articles by other amateur radio club newsletters provided that proper credit is given to the individual author and to *The GARZETTE*.

The GARZETTE is published each month with the assistance of Hal Manning, who prints the news letter. Rick Patchin, KD4RFK does the final production work on *The GARZETTE* by folding & labeling. Bill Cherepay, WB4WTN, stamps and gets the end product to the Post Office each month. Norm Schklar, wa4zxv, manages email delivery. Many thanks to each of them and all article contributors. Deadline for submissions is the 20th of each month for inclusion in the following month's issue.

GARS General Membership meeting – 7/10/07 St. Marguerite D'Youville

Meeting commenced at 7:30pm

Meeting brought to order by President Norm Schklar WA4ZXV.

Introductions

Show and tell from the Field Day in June.

Slide show on some of the antenna launchers used in the contest at FD. Kurt, WA4HCE built his own after seeing some of the examples used at FD. He described how he built one and brought in the example for everyone to check out. It was made mainly from PVC pipe and electrical conduit. It was of enough diameter to launch a tennis ball as the main ballast with 60 lbs of air pressure.

Pictures of Field Day are on the GARS website – www.gars.org

Tonight's program is being presented by Will Perkins W1ZRV. He will be discussing Family Emergency Preparedness. Will is employed by FEMA. His PowerPoint slide show will be posted on the GARS website.

Business Meeting:

No old business. Minutes are in the Garzette and were accepted by the meeting.

Treasurer - Amy Woodrick KE4IKF – budget needs to be accepted. Copies were distributed to the group.

Monthly budget – June's budget reflects the check made out to the Scholarship Fund recipient. A new account was created to house the funds for the scholarship.

Norm and Amy will be happy to answer questions about the budget. The spending and income were about the same. Major changes included a decrease in the holiday party expenditures. Also assumed was a decrease in dues income. Donations are made throughout the year to various groups – this will be watched a little more closely and may decrease slightly. Club expenditures are mainly for meeting donuts, repeater costs and utilities, holiday party subsidy and of course Field Day. Forecasted spending for a new repeater controller has been taken off of the budget since the controller was not purchased. Budget was approved by the meeting.

Program Manager – David Bruse W4DTR - August meeting will be either QRP or a presentation by the Amateur Radio Museum. September is currently slated to be a presentation on Logbook of the World. October will be whichever program is bumped from August. November is still open to suggestions. December will be the annual holiday party.

Sign ups for the Dog Show are happening NOW! The Dog Show will be August 24-26. We will be helping with the parking as usual. Please contact Amy Woodrick KE4IKF to sign up for a shift. 6am – 2pm and YES! You can split the shifts.

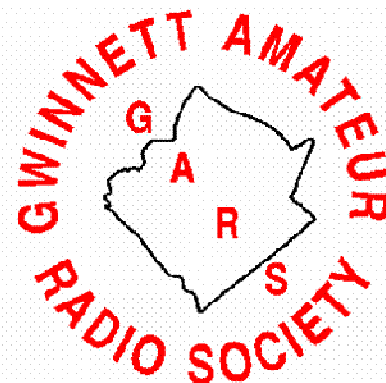

Membership – 4 new member applications – KI4WNZ Jeff Lee, KI4WNY Brittney Hancock, W1ZRV Will Perkins and wife Judy. JOTA – Jamboree on the Air - will be held at Rhodes Jordan Park at the Troop 54 Scout Hut. JOTA will be held on the 3rd full weekend in October. Info will be on KK4BSA website. More info will be posted on the GARS website as well.

TechFest – Jan. 12, 2008 – Info on the GARS website www.gars.org. Two to three clubs will be present at the GARS meeting facility – St. Marguerite d'Youville Church. Events and presentations to include a tailgate for swap/sell of equipment, lunch and a chili cook off, presentations on Echolink, QRP, and presentations from possible vendors. Several forums are in the works. If you would like to set up a table or have a presentation – please get an application form from Ray Back KI4GRJ, Norm WA4ZXV, or check out the GARS website.

Susan Swiderski AF4FO – update on Johnny Fearon – she spoke to him today at length. He is doing well and is planning to try to be at the next meeting.

N9SXJ - Dick Sandberg - got a round of applause for doing such a great job as Field Day chair this year.

Door Prizes were drawn at the meeting's conclusion.

**I Have Bacon.
Field Day 2007
By KI4MEH**

Field Day, the event of the year starts with the breakfast of the year. This is the one time a year I get to break training and have food at breakfast. Food at breakfast, what a concept. I piled it high and wide. The food on my plate was divided into two categories, brown and white and both were covered in gravy. As I worked my way through the mountain of perfection that was my breakfast Dick N9SXJ commented on the fact I was being exceptionally quiet. I looked him straight in the eye and in my most somber tone said, "I have bacon".

At breakfast I met a brand new ham, Brittney KI4WNY. The excitement and eagerness of a ham with a ticket less than a week old on Field Day can only be compared to a new puppy turned loose in Pet Smart. Brittney, is the granddaughter of our own Ken, KI4BQS. And so the torch is past, or the disease spread depending on your point of view. After breakfast I had to make a quick stop at a client that was having a small network problem. Four very long hours later I was on my way back to Field Day. The Computer Gods hate me.

I got back in time for lunch and found Field Day in full swing. There was a group around every band station, and the air was thick with RF. I met friends old and new. Some I had not seen since the last Field Day. While I was missing in action the antenna launch contest was held. I never found out who won but the stories I heard conjured up an image of "Rube Goldberg goes to Field Day". I am greatly disappointed to have missed out on the event but have already started planning my entry for next year. All I need is a source for some Navy surplus ship-to-ship signal rockets.

As I visited each band station I noticed everyone had that special charge that you only get at Field Day. Every station was exactly as it should be. All except the CW station. The guys there were doing a great job with Ron leading the way, having fun, telling stories, reading code, and sharing CW jokes that go right over a new guy like me.

But there was something missing. Johnny W4WKP. Most of you know Johnny had the misfortune to be stuck in the hospital on Field Day. Everyone missed him and it seemed every third story I heard had Johnny in it.

There are certain things you come to depend on seeing at Field Day. David in his hard hat during setup, Norm relaxing with a cigar after setup, and Johnny at the CW station. He was greatly missed. At the time I write this I understand his condition is much improved and he will be going home in a few days. I know we all wish him a speedy recovery and hope he doesn't put us through another Field Day without him.

Another brief medical note. It seems Ron has lost his butt. I had not seen Ron since the Christmas party and he has lost so much weight I almost didn't recognize him. He has lost so much his butt is entirely gone. It has been suggested that some of us are big enough butts to compensate for Ron's loss. While a mathematically sound idea, the engineering seems extremely faulty. Anyone finding Ron's butt please post a notice on the Reflector and we'll try and get it returned to him.

But every loss is offset by a gain somewhere. And I gained a radio at Field Day. John WB4QDX delivered my 900mhz radio. It has everything but a base for the antenna and an adapter for the antenna connection. Looks like a trip to HRO. Oh darn. The coolest spot at Field Day was the ARES trailer. Not only did it have some of the coolest equipment, the trailer had air conditioning. I am more and more impressed with the ARES trailer every time I see it. Ryan and Tim once again came through with setting up the trailer and making sure everything was ready for a perfect Field Day. I took the opportunity to take lots of pictures of every conceivable feature of the trailer in case some day I get to build my own smaller mobile radio shack. When my wife saw the trailer pictures she said, "*That's what you need for all your radio stuff*". Don't you just love it? I feel a winter project coming on.

As the sun set and the temperature dropped the hard-core operators settled in for a night of DXing and those not working stations turned to other fun. Some of that fun was of a semi-questionable nature. I could hear my Grandmother saying something about idle hands and the Devil as I watched two of our senior leadership terrorize some of younger attendees. While the youngsters were using the Porta-John the seniors banged and tilted the box and played some mind games. It makes you proud to know you are represented by such serious, dignified individuals. The dawn brought a traditional GARS Field Day outdoor breakfast that was enjoyed by all. Those that had stayed and made it through the night had that special look of accomplishment that only comes from working contacts till the first break of day.

Breakfast also brought an abundance of stories about other all niters. The stories ranged from Scouting and family campouts from our youth to one that included Rum, Mexico, a professional "dancer", and bail. I never question the honesty of storytellers but it might be evidence that a reliable memory is one of the first things to go. But I can't remember. Then came the time to pack up and tear down. Instead of being downbeat the conversation turned to excited plans for next years Field Day. What kind of people can come to the end of an event like Field Day and immediately start planning for next years event? Amateur Radio Operators. And damn proud of it.

Moving

By KA4KKF

Moving to a new house is not easy. There are all the address changes that have to be done. The utilities have to be setup and arrangement for all the people to come out to the new house and turn everything on. You have to take the ham shack apart and get rid of a lot of stuff that doesn't fit at the new house. After weeks of packing and trashing and storing away stuff that would not be needed. You find out you need something that is packed away and you don't remember where you packed it. It'll have to wait. The day finally comes and everything is moved by the packers and you must now get busy and unpack and setup the shack. But wait, the shack is in the basement and it is full of boxes and the house upstairs is full of boxes and furniture and the wife is ready for me to start unpacking and setting everything up. Oh! Everything upstairs. Well during the night time hours and some minutes carved out of the day I got a 2 meter antenna up in the attic. Six meters is marginal and nothing on HF yet.

After 2 weeks, we finally get things looking like we have been in the house for awhile. It is starting to look like home. Now, I can concentrate on the shack and the basement. Get the shelves up and all the computers going. The wiring and the lighting must be setup. Next will be the antennas and running coax from the attic to the basement. Lucky me, the previous owner had a 2 inch pipe run from the attic to the basement. It is in the right place to drop coax in and come into the shack. Give me another month or so and I'll be on the air again and having fun on the airwaves.

When you get ready to move, make sure you label the boxes in some form or fashion to know which ones to unpack first. That way you don't have to unpack all of them to find what you need to get on the air. Good luck with your move and we'll see you at the next club meeting.

Q. When I read your e-mails, a security box pops up. It says, "This site contains both secure and non secure items." Is there a way to stop this? It is very annoying.

A. I have seen that message, too. As I recall, it asks if you want to display the non secure items. How are you supposed to make a decision? You don't even know what it means.

Nothing in my newsletters require security. However, they may contain links to secure pages. Perhaps that is the problem. Whatever it is, I agree that it is annoying.

I can't really track this down, because I don't know which program you use. However, both Firefox and Internet Explorer have settings that might cause it. So let's look at them.

In Internet Explorer, click Tools>>Internet Options. Select the Advanced tab. Scroll to the end of the Settings box. Clear the box next to "Warn if changing between secure and not secure mode."

In Firefox, click Tools>>Options. Select the Security tab. Click Settings. That opens the Security Warnings window. Uncheck the box next to "I'm about to view an encrypted page that contains some unencrypted information."

Some warning messages are easy to track down; others are real bears. And some make so little sense that you can't begin to work with them. Here's one about people being [signed on to your computer](#).

The Recycle Bin has its own warning message. It asks if you really want to delete things. It's pointless; you can always retrieve deleted items from the Recycle Bin. So here's how to [turn it off](#).

Have Breakfast with GARS

GARS has a social breakfast on Saturday mornings at the Golden Coral on Riverside Drive in Lawrenceville. We usually get there about 0730 and leave about 0900 or 1000. We talk radios and solve the problems of the world. We even have a qso with w4ade in Florida over echolink.

It is a great time to meet and eat. The food is very good too.

The Golden Coral is behind Pike's nursery at the intersection of Riverside Drive and Hwy 120 in Lawrenceville.

Someone will be on the repeater too.

Hope to see you there.

Monday Night Net Script

This is a suggested script only. If you are familiar with the net and have your own style, please feel free to continue. ALL CAPITALIZED (RED) LINES ARE DIRECTIONS FOR NET CONTROL EVERYTHING ELSE SHOULD BE READ. FEEL FREE TO MAKE CHANGES AS APPROPRIATE.

CQ.....CQ.....CQ.....CQ

This is (call sign), (phonetically), (name), with the Gwinnett Amateur Radio Society Monday night Want, Swap, Sell and Information net. This net meets every Monday night at 8PM, to help keep amateur radio operators up to date on events and news and allows participants a chance to offer items for sell, trade.

You do not have to be a member of GARS to participate in this net, and all are welcome to join in. This is not an emergency net, however, if there is any emergency traffic during the net, please inform net control by saying "BREAK BREAK" and your call sign, and the net will handle the emergency traffic as required.

The Gwinnett Amateur Radio Society is an amateur radio club serving Gwinnett County, Georgia, in the North Metro Atlanta area. We are a Special Service club affiliated with the ARRL. With over 130 members, GARS is an active part of the Amateur Radio community, and plays an important role in Gwinnett County. We invite you to join us at our next meeting to learn more about us. To learn more about the Gwinnett Amateur Radio Society, please visit our web site at www.gars.org.

When checking in net control asks that you give your call sign once, then again phonetically, and then your name and location. Also, while checking in, please inform net control if you have any swap shop items or announcements.

Remember that to check into our net you do not have to be a member of Gwinnett Amateur Radio Society to check-in.

When checking in, please key down and say "THIS IS", then un-key and listen for others. If you don't hear anyone else doubling, key down and check in. Net control will now take check-ins in the following order:

First: Short Timers, Mobile or Low Power stations.

Second: Officers and Committee Chairs.

Third: Announcements, want, swap, sell, trade items.

Fourth: General Check-ins.

A volunteer to serve as Alternate Net Control Station is needed. The Alternate Net Control should be prepared to assume control at any time if the Net Control Station becomes disabled. Anyone willing to serve as Alternate Net Control for the GARS Net, please call Net Control now.

(callsign) Thank you for being alternate net control.

CHECK-INS

We will now take Short Timers, Mobile, or Low Power check-ins.

TAKE CHECK-INS AND RECORD THEM IN YOUR LOG. VERIFY THE CALL SIGN, NAME AND LOCATION OF EACH CHECK-IN.

We will now take check-ins from Officers or Committee Chairs ONLY

TAKE CHECK-INS AND RECORD THEM IN YOUR LOG. VERIFY THE CALL SIGN, NAME AND LOCATION OF EACH CHECK-IN.

We will now take check-ins from anyone with an item to swap, sell, trade or a want and announcements.

TAKE CHECK-INS AND RECORD THEM IN YOUR LOG. VERIFY THE CALL SIGN, NAME AND LOCATION OF EACH CHECK-IN.

GO TO THE TOP OF THE LIST AND ALLOW THOSE THAT CHECKED IN TO MAKE THEIR ANNOUNCEMENTS.

AFTER ALL ANNOUNCEMENT, ASK IF ANYONE NEEDS FILLS OR REPEATS ON THE ANNOUNCEMENT, THEN THANK THE CHECK-IN FOR THE ANNOUNCEMENT.

AFTER ALL ANNOUNCEMENTS HAVE BEEN MADE PAUSE FOR ADDITIONAL CHECK-INS

Net control (Call Sign) will now take general check-ins.

TAKE CHECK-INS AND RECORD THEM IN YOUR LOG. VERIFY THE CALL SIGN, NAME AND LOCATION OF EACH CHECK-IN.

CONCLUSION

NET CONTROL SHOULD RECAP THE ANNOUNCEMENTS FOR LATE CHECK-INS

Net control (Call Sign) will now recap the announcements.

IF NONE, CONCLUDE THE NET.

This is (call sign), (name) and I will be closing the net at (time) and returning the repeater back to normal use. Thank you (callsign) for being alternate net control. Officers and Committee Chairs of GARS would like to thank all of you for checking in and would ask that you join us here next week at 8:00 pm. Until then 73 this is (call sign) (name) clear.

Do you know a boy or girl
14 to 21 years old
who wants to:

Climb, Hike
Canoe, Camp
Talk on an amateur radio
Have Fun
Tell them about
